

Dimitar Porkov

DevOps Engineer

Profile

SAP CI Operations professional at Digitall Bulgaria with over five years of experience in cloud technologies and CI/CD methodologies. Passionate about driving innovation and delivering impactful solutions through automation and scalable infrastructure.

Methodical and results-oriented, with hands-on expertise in DevOps tools such as Docker, Jenkins, Terraform, and Ansible. Proven ability to troubleshoot complex issues in SAP Cloud Foundry and Neo environments, streamline workflows, and support robust CI/CD pipelines.

Enthusiastic about space technology and eager to contribute to mission-critical systems in dynamic, cloud-native environments. Seeking opportunities to join forward-thinking teams where innovation meets exploration.
